

Notes:

1. Black area is the game area. Its height 12 inches.
2. The mat has 0.5 inch thickness (which makes the perimeter height 11.5 inches)
3. Thick tapes are 2 inch wide, thin tapes are 1 inch wide
4. Recycle boxes are taped outside of the perimeter, will be approximately leveled on the top of field perimeter.
5. Robot are not allowed to touch the Ocean area at anytime; but can touch the tape.
6. Robots are allowed to enter the Island. However, they are not allowed to enter each other's coastline area.
7. Research lab bins have 5 inches height.
8. Water sample cubes will be placed randomly into ocean area. Robots must pick them up without touching the ocean. These needs to be taken into Research lab bins on the islands
9. Water bottles and tennis balls will be placed randomly on each side's coastline. These needs to be placed into recycle boxes without touching the ocean.
- 10 Stray animals will be placed on island randomly. These needs to be placed into ocean area without touching ocean.
